

# SKG SERIES

SUBMERSIBLE SOLIDS HANDLING PUMPS FOR  
FLUSHABLE/DISPOSABLE WIPES & OTHER HARD TO PUMP SOLIDS

PATENT PENDING RAD-AX™  
DUAL SHREDDING TECHNOLOGY

# SKG SERIES

The SKG Series pumps obliterate flushable wipes and other difficult solids in wastewater applications. Featuring innovative patent-pending RAD-AX™ Dual Shredding Technology and robust construction, the SKG Series offers optimal performance, reduced maintenance and extended life.

## Superior Solids Handling Technology

- Flushable & Disposable Wipes
- Rags
- Diapers
- Metal Cans

## Pump Features & Benefits

- Efficient, high solids passage impeller and volute design, coupled to a high torque 4-pole motor. (2, 3, & 5 HP)
- Oil-lubricated double mechanical seals, and separate lip seal.
- Seal Minder® seal oil leak detector.
- Heavy Duty SOOW power cord.
- Three thermal sensor switches embedded in windings and connected to motor control circuit.
- Heads to 49'. GPM to 480.
- 208, 230, 460 & 575V available.

## DUAL SHREDDING TECHNOLOGY

- RAD-AX™ Dual Shredding Patent Pending System featuring radial and axial shredding elements.
- All shredding elements constructed of hardened 440C Stainless Steel with a Rockwell hardness of 55C plus.
- Shredding System efficiency to alleviate potentially high surge load to the motor.

## The Solution For Tough Applications

- Water Treatment Facilities
- Food Processing Plants
- Industrial Parks
- Airports
- Hospitals
- Aquatic Parks
- Bottling Plants
- & Many More
